White Squall

Active Ingredient:

Hypochlororus acid.....0.028%

Inert Ingredients.....99.792%

CAUTION

Keep out of Reach of Children

COMMERCIAL USE ONLY

White Squall is a multipurpose highly concentrated root zone purifier, that descales and removes potentially harmful bio-films in nutrient reservoirs. By reducing the habitat of plant pathogens **White Squall** is proven to aid in root development and purification.

Weekly treatment for Hydroponic System/Reservoir: Add 3 mL of **White Squall** per gallon of nutrient solution every 5-7 days.

Periodic Flush: Add 5-7 mL of **White Squall** per gallon of water and continue to irrigate as normal. Continue the process for 12-24 hours then drain.

Final Flush: Add 5-7 mL of **White Squall** per gallon of water and continue to irrigate as normal. Continue the process for the last 3-5 days of fruiting/blooming cycle.

Cloning/Propagation: Add 5-10 mL of **White Squall** per gallon of fresh water at the beginning of the cloning/propagation process. Cuttings may be dipped or fully immersed in 25-30 mL of **White Squall** per gallon of water for 20-30 seconds.

Reservoir Cleaning (without plants): Add 30mL of **White Squall** per gallon of water. Circulate for 1-24 hours then drain.

Cleaning used media: Soak overnight in 30 mL of **White Squall** per gallon of water.

ALWAYS SHAKE PRODUCTS THOROUGHLY
